## Quality is our passion, not just a responsibility

The history started when a father said "don't manufacture any medicine which you can't give to your parents". He said this when his sons sought his permission to establish **ARISTOPHARMA** in 1986. The father has passed away, children have grown up, grandchildren have come but the advice has remained fresh in the hearts of all ARISTO members. Every granule we formulate, every tablet we compress, every drop we produce – we take care so that it can be given to our parents, our children, our grandchildren. With continuous practice, it has now turned from responsibility to our passion & this is **ARISTOPHARMA** – passionately committed to produce quality medicines.

## MESSAGE

**Sardar Md. Sakhawat Husain MP**  
Minister  
Ministry of Health & Family Welfare  
Government of the People's Republic of Bangladesh

I am pleased to note that the 17th ASIA PHARMA EXPO-2026 and ASIA LAB EXPO-2026, an International Exhibition on Complete Pharmaceutical Manufacturing, will be held during 29–31 March 2026 at the Bangladesh China Friendship Exhibition Centre (BCFEC), Purbachal, Dhaka, Bangladesh.

The pharmaceutical industry of Bangladesh has achieved remarkable progress and has become a vital pillar of the national healthcare system and the economy. At present, the local pharmaceutical industry is meeting around 98% of the domestic demand, ensuring the availability of quality and affordable medicines for the people. In addition, Bangladeshi pharmaceutical products are being exported to more than 157 countries, contributing significantly to export earnings and global recognition of our manufacturing capabilities.

I believe that ASIA PHARMA EXPO-2026 and ASIA LAB EXPO-2026 will provide an excellent platform for policymakers, researchers, industry leaders, and international stakeholders to exchange knowledge, foster innovation, and explore new opportunities for collaboration and investment in the pharmaceutical and healthcare sectors.

I sincerely commend the Bangladesh Association of Pharmaceutical Industries (BAPI) for organizing this prestigious exhibition and for their continuous efforts to promote the development of the pharmaceutical industry of Bangladesh.

I wish the exhibition a grand success.

**Sardar Md. Sakhawat Husain MP**

## MESSAGE

**Dr. M A Muhit MP**  
Minister of State  
Ministry of Health & Family Welfare  
Government of the People's Republic of Bangladesh

I am pleased to inform that the 17th ASIA PHARMA EXPO-2026 and ASIA LAB EXPO-2026, an International Exhibition on Complete Pharmaceutical Manufacturing, will be held during 29–31 March 2026 at the Bangladesh China Friendship Exhibition Centre (BCFEC) Dhaka, Bangladesh.

The pharmaceutical industry of Bangladesh has made significant progress and has become an integral part of our national healthcare system. The industry is now meeting nearly 98% of the domestic demand, ensuring the availability of quality and affordable medicines for our people. Furthermore, Bangladeshi pharmaceutical products are being exported to more than 157 countries, strengthening the country's position in the global pharmaceutical market.

The Government of Bangladesh is committed to strengthening the healthcare system and ensuring equitable access to essential medicines for all citizens. In this regard, initiatives are being taken to enhance pharmaceutical manufacturing capacity, promote research and innovation, expand primary healthcare services, and strengthen collaboration among industry, academia, and research institutions.

I believe that ASIA PHARMA EXPO-2026 and ASIA LAB EXPO-2026 will serve as an important platform for showcasing technological innovations, fostering international partnerships, and exploring new investment opportunities in the pharmaceutical and healthcare sectors.

I would like to express my sincere appreciation to the Bangladesh Association of Pharmaceutical Industries (BAPI) for organizing this prestigious exhibition and for their continued contribution to the development of the pharmaceutical industry in Bangladesh.

I wish every success of the exhibition.

**Dr. M A Muhit MP**

**Md. Quamruzzaman Chowdhury**  
Secretary  
Health Services Division  
Ministry of Health & Family Welfare  
Government of the People's Republic of Bangladesh

It gives me immense pleasure to extend my warmest greetings to the organizers, exhibitors, and distinguished delegates participating in the 17th Asia Pharma Expo & 7th Lab Expo 2026 in Dhaka. This premier event serves as a vital platform for showcasing the technological prowess and the expanding horizons of our pharmaceutical sector on the global stage.

As we move toward the realization of a "Smart Bangladesh," the health sector remains a cornerstone of our national development. In alignment with the government's 31-point reform agenda for the health sector, we are committed to ensuring universal health coverage and providing quality, affordable healthcare to every citizen. Our strategy focuses on a comprehensive overhaul of the healthcare system—from strengthening disease prevention and healthcare workforce development to fostering a patient-friendly environment that restores public trust in our local medical services.

The pharmaceutical industry is a key partner in this journey toward self-reliance. By emphasizing the production of essential life-saving drugs locally and adhering to the highest international quality standards, you are helping us reduce the healthcare burden on our citizens and minimize the necessity for overseas treatment. We are particularly focused on the digital integration of health services and the regulation of drug prices, ensuring that innovation translates into equitable access for even the most marginalized communities.

I commend the pharmaceutical leaders and scientists present here for their dedication to excellence. Your pursuit of Industry 4.0 standards and sustainable manufacturing is not just a business milestone; it is a national service that supports our goal of achieving a healthy, strong, and productive population by 2041.

I wish the 17th Asia Pharma Expo 2026 immense success and hope it fosters the partnerships necessary to transform the future of global health.

**Md. Quamruzzaman Chowdhury**

## MESSAGE

17<sup>th</sup>  
**asia** **ASIA**  
PHARMA EXPO | LAB EXPO

**Mohammad Hasan Arif**

Vice Chairman & Chief Executive  
Export Promotion Bureau  
Ministry of Commerce,

Government of the People's Republic of Bangladesh

I am pleased to know that the Bangladesh Association of Pharmaceutical Industries (BAPI) and GPE Expo Pvt. Ltd. are jointly organizing the 17th International Exhibition on Complete Pharma Manufacturing—ASIA PHARMA EXPO-2026 and ASIA LAB EXPO-2026, scheduled to be held from 29–31 March 2026 at the Bangladesh China Friendship Exhibition Centre (Big Wave), Purbachal, Dhaka.

This significant Expo continues to serve as a comprehensive platform for pharmaceutical manufacturers, technology providers, and stakeholders to showcase innovations in pharmaceutical formulations, bulk drugs, processing plants and equipment, packaging machinery, materials, laboratory instruments, research and development, digital solutions, and technical services. The technical seminars and knowledge-sharing sessions will further contribute to strengthening industry capacity and fostering innovation.

The pharmaceutical sector of Bangladesh has been recognized as a Thrust Sector by the Government, and significant policy support has been extended to promote export growth. Export incentives, including cash incentives for Active Pharmaceutical Ingredients (API) and finished formulations, have helped accelerate global market penetration. The establishment of the API Industrial Park, spanning 200 acres and accommodating multiple pharmaceutical manufacturers, represents a major step toward achieving self-reliance in raw material production and enhancing global competitiveness.

In recent years, Bangladesh has emerged as a reliable global supplier of quality medicines, exporting pharmaceutical products to more than 157 countries across Asia, Africa, Europe, and the Americas. As Bangladesh prepares for LDC graduation, the pharmaceutical industry is strategically focusing on innovation, regulatory compliance, sustainability, and expansion into regulated markets to ensure continued export growth and competitiveness.

I sincerely appreciate the initiatives of BAPI and GPE Expo Pvt. Ltd. for organizing ASIA PHARMA EXPO-2026 and ASIA LAB EXPO-2026 and wish the organizers every success in making this event a landmark platform for global pharmaceutical collaboration.

**Mohammad Hasan Arif**

## MESSAGE

**Major General Md. Shameem Haidar**  
Director General  
Directorate General of Drug Administration  
Government of the People's Republic of Bangladesh

It is a profound honor to acknowledge the commencement of the 17th ASIA PHARMA EXPO-2026 and ASIA LAB EXPO-2026. This premier international exhibition, dedicated to the entire spectrum of pharmaceutical manufacturing, serves as a testament to our nation's industrial prowess. I am delighted that this significant event will be hosted from 29–31 March 2026 at the Bangladesh China Friendship Exhibition Centre (BCFEC) in Purbachal, Dhaka.

Bangladesh has firmly established itself as a premier pharmaceutical manufacturing hub within the developing world. It is a point of immense national pride that our local industry now fulfills approximately 98% of domestic demand. With a market valuation exceeding USD 4 billion and a robust upward trajectory, our pharmaceutical sector is a cornerstone of the national economy.

Our commitment to quality is validated globally. Today, Bangladeshi medicines are exported to about 162 countries. This includes the most stringent and highly regulated markets, such as the USA, Europe, Australia, and Canada. Our manufacturers have earned prestigious accolades and certifications from world-class regulatory bodies, including US FDA, UK MHRA, EMA, TGA-Australia, ANVISA (Brazil), Health Canada, and others.

We have undertaken landmark initiatives to ensure long-term sustainability, most notably the establishment of the Active Pharmaceutical Ingredient (API) Industrial Park in Munshiganj. This project is a critical milestone in reducing import dependency and fostering self-reliance in raw material production. To align with global best practices, we are continuously modernizing our regulatory landscape through enhanced transparency, strengthened Quality Assurance frameworks, increased investment in Research and Development (R&D) and technical capacity building.

The pharmaceutical industry stands at the forefront of our economic evolution. Our future lies in innovation like expanding our horizons into biosimilars, vaccines, and advanced therapies to maintain our competitive edge on the global stage. We are confident that this exhibition will serve as a vital catalyst for technology transfer, international synergy, and strategic networking. It is through such platforms that we will diversify our product portfolios and deepen our footprint in the global healthcare market.

We would like to extend my sincere appreciation to the Bangladesh Association of Pharmaceutical Industries (BAPI) for their tireless dedication in organizing this 17th edition and for their unwavering commitment to the growth of our industry.

I wish the ASIA PHARMA EXPO-2026 and ASIA LAB EXPO-2026 resounding success.

**Major General Md. Shameem Haidar**

## MESSAGE

17<sup>th</sup>  
**asia ASIA**  
PHARMA EXPO | LAB EXPO

**Abdul Muktedir**

President

Bangladesh Aushad Shilpa Samity

Bangladesh Association of Pharmaceutical Industries (BAPI)

As president, it is my great pleasure to welcome participants, exhibitors, and distinguished guests to the 17th International Exhibition on Complete Pharmaceutical Manufacturing Technologies - ASIA PHARMA EXPO 2026 and ASIA LAB EXPO 2026, jointly organized by the Bangladesh Association of Pharmaceutical Industries (BAPI) and GPE Expo Pvt. Ltd. The exhibition will be held from 29-31 March 2026 at the Bangladesh China Friendship Exhibition Center, Purbachal, Dhaka.

Over the years, ASIA PHARMA EXPO has evolved into one of the most prominent international gatherings for the pharmaceutical manufacturing and laboratory technology sectors in South Asia. The event serves as a dynamic platform where global technology providers, machinery manufacturers, raw material suppliers, researchers, and industry leaders come together to exchange knowledge, explore innovations, and strengthen business collaboration.

In this regard, ASIA PHARMA EXPO and ASIA LAB EXPO offer an excellent opportunity for our professionals, scientists, engineers, and supply chain specialists to interact with leading global technology partners and gain first-hand exposure to the latest developments in pharmaceutical manufacturing and laboratory systems.

In addition, this exhibition also brings world-class material suppliers, machine manufacturers, and technology providers to Bangladesh, creating significant opportunities for business networking, technology adoption, and industry advancement. I strongly encourage industry professionals to take full advantage of this prestigious international platform.

I extend my sincere appreciation to all exhibitors, partners, and stakeholders for their continued support in making this important event possible.

I wish ASIA PHARMA EXPO 2026 and ASIA LAB EXPO 2026 every success

**Abdul Muktedir**

## MESSAGE

17<sup>th</sup>  
**asia** **ASIA**  
PHARMA EXPO | LAB EXPO

**Dr. Md. Zakir Hossain**

Secretary General

Bangladesh Aushad Shilpa Samity

Bangladesh Association of Pharmaceutical Industries (BAPI)

The Bangladesh Association of Pharmaceutical Industries (BAPI), in collaboration with GPE Expo Pvt. Ltd., is organizing the 17th International Exhibition on Complete Pharmaceutical Manufacturing Technologies - ASIA PHARMA EXPO 2026 and ASIA LAB EXPO 2026, to be held from 29 to 31 March 2026 at the Bangladesh China Friendship Exhibition Center (BCFEC), Purbachal, Dhaka, Bangladesh.

ASIA PHARMA EXPO has established itself as one of the most prominent international pharmaceutical exhibitions in South Asia, providing a comprehensive platform for showcasing pharmaceutical manufacturing technologies, laboratory innovations, and industrial solutions. Over the years, the exposition has played a pivotal role in fostering technology transfer, promoting industrial collaboration, and strengthening institutional and technical capacity within the pharmaceutical sector of Bangladesh.

The pharmaceutical industry of Bangladesh is one of the fastest-growing industrial sectors in the country, meeting approximately 98% of domestic demand and exporting pharmaceutical products to more than 157 countries worldwide. The sector contributes significantly to employment generation, technological advancement, and export diversification, while ensuring access to affordable and quality medicines for the population.

The Government of Bangladesh has declared the pharmaceutical sector as a Thrust Sector and has introduced various policy measures and incentives to promote industrial development, export expansion, and technological upgradation. A landmark initiative in this regard is the establishment of the Active Pharmaceutical Ingredients (API) Industrial Park at Gazaria, Munshiganj, which is expected to enhance local API production capacity, reduce import dependency, and strengthen the pharmaceutical value chain through increased local value addition and foreign and domestic investment.

In this context, ASIA PHARMA EXPO 2026 will serve as a critical platform for engaging global technology providers, manufacturers, researchers, regulators, and investors. The exhibition will facilitate knowledge exchange, business networking, and strategic partnerships, thereby supporting the modernization and sustainable growth of the pharmaceutical and healthcare industries of Bangladesh.

I am confident that ASIA PHARMA EXPO 2026 and ASIA LAB EXPO 2026 will contribute significantly to strengthening the competitiveness of the pharmaceutical sector and enhancing Bangladesh's position in the global pharmaceutical market.

I wish the organizers and participants every success and extend my best wishes for the successful hosting of this prestigious international event.

**Secretary General Name**

**Major General (Retd.) Md. Mustafizur Rahman**  
Chief Executive Officer (CEO)  
Bangladesh Association of  
Pharmaceutical Industries (BAPI)  
& API Industrial Park Services Limited (APIPSL)

I am pleased to learn that the Bangladesh Association of Pharmaceutical Industries (BAPI), in collaboration with GPE Expo Pvt. Ltd., is organizing the 17th International Exhibition on Complete Pharmaceutical Manufacturing Technologies — ASIA PHARMA EXPO 2026 and ASIA LAB EXPO 2026, to be held from 29 to 31 March 2026 at the Bangladesh China Friendship Exhibition Center (BCFEC), Purbachal, Dhaka, Bangladesh.

The pharmaceutical industry of Bangladesh has emerged as one of the most dynamic and strategically important sectors of the national economy, ensuring access to quality medicines for the population and contributing to industrial growth, technological advancement, and export diversification. The sector continues to strengthen its capacity, quality standards, and global outreach through sustained investment and innovation.

A key milestone in the future development of the sector is the establishment of the Active Pharmaceutical Ingredients (API) Industrial Park at Gazaria, Munshiganj. This flagship initiative is expected to enhance local API production capabilities, reduce dependence on imported raw materials, promote technology transfer, and attract both domestic and foreign investment, thereby strengthening the pharmaceutical value chain.

In this context, ASIA PHARMA EXPO 2026 and ASIA LAB EXPO 2026 will serve as an important international platform for showcasing advanced pharmaceutical technologies, promoting industrial partnerships, and facilitating knowledge exchange among global stakeholders. Such initiatives are essential for reinforcing regulatory compliance, technological modernization, and sustainable industrial development.

I am confident that this exposition will contribute significantly to strengthening the pharmaceutical manufacturing ecosystem of Bangladesh and enhancing its position in the global pharmaceutical market.

I wish ASIA PHARMA EXPO 2026 and ASIA LAB EXPO 2026 every success.

**Major General (Retd.) Md. Mustafizur Rahman**

## MESSAGE

**GPE expo (FZE)**  
UAE

Dear Esteemed Stakeholders, Exhibitors, and Visitors,

It is my great pleasure to welcome you to the **17th Edition of ASIA PHARMA EXPO 2026**, the region's premier international exhibition on complete pharmaceutical manufacturing technology. The event will be held from **29-31 March 2026** at the **Bangladesh China Friendship Exhibition Centre (BBCFEC), Purbachal, Dhaka, Bangladesh.**

Since its launch in 2003, ASIA PHARMA EXPO has evolved into one of the most influential pharmaceutical industry platforms in South Asia. For over two decades, the exhibition has consistently connected pharmaceutical manufacturers, technology providers, regulators, and industry leaders, creating a powerful ecosystem for innovation, knowledge exchange, and global business collaboration. Today, the expo stands as a trusted meeting point for the entire pharmaceutical manufacturing value chain.

The pharmaceutical landscape is currently undergoing rapid transformation driven by regulatory evolution, technological advancement, and shifting global supply chains. Bangladesh continues to strengthen its position as one of the world's fastest-growing pharmaceutical manufacturing hubs. The development of the **API Industrial Park** and the increasing number of internationally approved manufacturing facilities have created unprecedented opportunities for the country to expand its global footprint in pharmaceutical exports.

In this dynamic environment, staying up to date with the latest manufacturing technologies, quality standards, automation, packaging innovations, and regulatory frameworks has become more critical than ever. **ASIA PHARMA EXPO 2026** provides the ideal platform for industry professionals to discover new solutions, strengthen global partnerships, and explore emerging market opportunities.

On behalf of **GPE EXPO**, I would like to express my sincere appreciation to our valued partners and supporters whose commitment continues to make this event possible. We extend special thanks to the **Bangladesh Association of Pharmaceutical Industries (BAPI)** for their continued cooperation and industry leadership.

We are also grateful for the support extended by government bodies and trade organisations, including:

- Ministry of Industries
- Export Promotion Bureau (EPB), Bangladesh
- Pharmacy Council of Bangladesh
- Ministry of Health & Family Welfare
- Directorate General of Drug Administration (DGDA)

Our appreciation also goes to our media partners, international collaborators, and the hundreds of global companies and thousands of industry professionals whose participation continues to elevate this event's stature.

With **400+ exhibitors from over 20 countries and thousands of trade visitors expected**, ASIA PHARMA EXPO 2026 will once again serve as a comprehensive business and technology marketplace for the pharmaceutical manufacturing industry.

To our exhibitors and visitors, we encourage you to fully leverage this global platform to explore the latest technologies, engage in meaningful discussions, build new partnerships, and discover opportunities that will shape the future of pharmaceutical manufacturing.

We look forward to welcoming you personally in **Dhaka** and wish you a productive and successful experience at **ASIA PHARMA EXPO 2026.**

Warm regards,  
**Team GPE EXPO**

**DR. MD. ZAKIR HOSSAIN**  
Secretary General  
Bangladesh Association of  
Pharmaceutical Industries (BAPI)

## ANNUAL ACTIVITIES AND STRATEGIC ENGAGEMENTS OF THE BANGLADESH ASSOCIATION OF PHARMACEUTICAL INDUSTRIES (BAPI)

### INTRODUCTION AND SECTOR OVERVIEW

The year 2024 has been transformative for BAPI, defined by its relentless commitment to strengthening the pharmaceutical industry and contributing meaningfully to social welfare. This report outlines the key activities, strategic partnerships, and humanitarian efforts undertaken during the year.

The Bangladesh Association of Pharmaceutical Industries (BAPI), the apex trade body representing the pharmaceutical manufacturing sector of Bangladesh, extends its sincere appreciation to all member companies, government authorities, development partners, and stakeholders for their continued cooperation and trust.

Over the past year, the pharmaceutical industry of Bangladesh has demonstrated remarkable resilience and progress, strengthening its role as a critical pillar of national healthcare, economic development, and export growth. The sector continues to evolve as one of the most technologically advanced manufacturing industries in the country, supplying high-quality medicines to the domestic market and exporting to more than 157 countries worldwide.

BAPI has actively engaged in policy advocacy, regulatory reform, industry development, international cooperation, and capacity-building initiatives to ensure sustainable growth and global competitiveness of the sector. The Association remains committed to supporting national health security, fostering innovation, and enhancing Bangladesh's positioning in the global pharmaceutical value chain.

### EMERGENCY RESPONSE TO AIRPORT CARGO FIRE INCIDENT

On 18 October 2025, a major fire incident at the Hazrat Shahjalal International Airport Cargo Village resulted in significant damage to imported pharmaceutical raw materials. Recognizing the potential risk to national medicine supply chains, BAPI immediately initiated emergency coordination with government authorities.

The Association requested priority clearance and special handling for pharmaceutical consignments and advocated for expedited storage and transportation arrangements. To protect temperature-sensitive materials, BAPI facilitated the deployment of cool reefer containers at the airport with tant for safe medicine storage. Additionally, real-time data was collected from member companies and submitted to relevant ministries to support evidence-based policy responses.

BAPI's primary objective during this crisis was to ensure continuity of medicine supply and safeguard national public health.

## ASSOCIATION ACTIVITIES

### PHARMACEUTICAL PRICING POLICY ADVOCACY

Pharmaceutical pricing remains a critical issue affecting industry sustainability, medicine accessibility, and public health outcomes. During 2025, BAPI engaged in multiple consultations with the Directorate General of Drug Administration (DGDA) and other relevant authorities to address structural and market-driven challenges in drug pricing.

The Association highlighted the impact of rising raw material costs, inflationary pressures, currency fluctuations, increased compliance costs, and global supply chain disruptions. BAPI advocated for a rational, transparent, and sustainable pricing framework that balances public affordability with industry viability, ensuring uninterrupted production and supply of essential medicines.

### PROGRESS IN API INDUSTRIAL PARK DEVELOPMENT

BAPI continued to address long-standing administrative and infrastructural challenges related to plot handover and operationalization of the API Industrial Park. Significant progress was achieved through coordination with relevant authorities.

Key activities included:

- Clearance of incinerator equipment at Chattogram Port
- Procurement and installation of a 500 kVA generator to ensure uninterrupted CETP operation
- Construction of boundary fencing for enhanced security
- Restoration and rehabilitation of CETP equipment affected by prolonged inactivity
- Tree plantation to improve environmental sustainability

- Submission of a proposal to allocate Plot A-26 for establishing a Central Laboratory for member companies
- Proposal for acquisition of adjacent land to establish a coal-fired energy project to meet park energy demand due to lack of gas connectivity

### SIMPLIFICATION OF LICENSING FOR CONTROLLED CHEMICALS AND NATIONAL SINGLE WINDOW INTEGRATION

Importation of pharmaceutical raw materials and specialty chemicals requires licensing from the Department of Narcotics Control, which historically involved complex and time-consuming procedures. BAPI raised this issue at a high-level consultative meeting chaired by the Honorable Special Assistant to the Ministry of Finance.

A joint committee comprising government officials and BAPI representatives was formed to identify regulatory bottlenecks and propose reforms. The committee conducted multiple reviews and submitted a comprehensive report with recommendations to reduce processing time, minimize bureaucratic barriers, and limit unnecessary physical inspections.

Efforts are ongoing to integrate the simplified licensing procedures into the National Single Window (NSW) digital platform, contributing to trade facilitation and ease of doing business.

### MINIMUM WAGE STRUCTURE FOR PHARMACEUTICAL WORKERS

In 2025, a new minimum wage structure for pharmaceutical industry workers was finalized after extensive consultations under the Ministry of Labour and Employment. BAPI actively represented employers' interests through its Treasurer and participated in committee deliberations.

Member companies participated in consultative meetings, and inspection teams conducted field

## ASSOCIATION ACTIVITIES

visits to pharmaceutical facilities in Gazipur and Barishal regions. Following tripartite negotiations among government, employers, and workers, the wage structure was finalized and published in the official gazette.

BAPI recognizes the importance of fair wages, industrial harmony, and sustainable workforce development as key pillars of industry stability.

### MEDIA ENGAGEMENT AND PUBLIC COMMUNICATION

To strengthen public understanding of the pharmaceutical sector, BAPI conducted multiple workshops with the Bangladesh Health Reporters Forum. Journalists from print and electronic media participated in these sessions, enhancing mutual understanding and fostering responsible reporting.

BAPI facilitated factory visits for journalists to observe pharmaceutical manufacturing processes, quality assurance systems, and compliance with international standards. These initiatives contributed to improved public awareness of the sector's role in healthcare, exports, and national development.

### INTERNATIONAL ENGAGEMENT AND BILATERAL COOPERATION

BAPI hosted bilateral meetings with delegations from Pakistan, Afghanistan, and Djibouti to explore cooperation in pharmaceutical trade and industrial collaboration. The Association presented Bangladesh's manufacturing capacity, GMP

compliance, regulatory approvals, research capabilities, and competitive advantages.

Discussions focused on joint ventures, technology transfer, market access strategies, and future trade expansion, strengthening Bangladesh's global pharmaceutical footprint and opening new export opportunities.

### POLICY REPRESENTATION AND STAKEHOLDER ENGAGEMENT

BAPI significantly expanded its engagement with national policymakers and institutions. During the reporting year, BAPI representatives participated in approximately 102 meetings organized by ministries, regulatory agencies, and public institutions.

This extensive participation reflects the Association's growing role in national policy dialogues, regulatory reform processes, and industry advocacy initiatives.

### REGARDING CAPACITY BUILDING ON TRIPS FLEXIBILITIES WORKSHOP

BAPI organized a knowledge-sharing workshop on TRIPS Flexibilities and their practical application in the pharmaceutical sector. International experts provided guidance on leveraging international trade frameworks to support local industry development.

Senior management and technical professionals from member companies participated, enhancing institutional capacity to navigate intellectual property and global trade rules.

## ASSOCIATION ACTIVITIES

### LDC GRADUATION PREPAREDNESS WORKSHOP

In anticipation of Bangladesh's graduation from the Least Developed Country (LDC) category, BAPI organized a high-level workshop to assess post-graduation challenges and opportunities. Topics included market access, regulatory transitions, intellectual property regimes, and industry readiness.

International experts provided strategic insights, and member companies engaged in policy discussions and strategic planning exercises to prepare for the post-LDC era.

### MEETING WITH DHAKA STOCK EXCHANGE (DSE) ON CAPITAL MARKET OPPORTUNITIES

During the reporting year, BAPI engaged with the Dhaka Stock Exchange (DSE) to explore avenues for greater participation of pharmaceutical companies in the capital market. This initiative aimed to identify sustainable financing opportunities, facilitate capital market access, and promote strategic collaboration between the sector and the stock exchange. BAPI's discussions focused on listing procedures, regulatory facilitation, and long-term investment frameworks to strengthen the financial capacity of member companies. The engagement reflects BAPI's proactive approach in supporting the sector's growth through diversified funding mechanisms and enhancing its role in national economic development.

### ASIA PHARMA EXPO 2025

The 16th ASIA PHARMA EXPO 2025, jointly organized by BAPI and GPE Expo (Pvt.) Ltd., attracted participation from more than 700 companies from 40 countries. The exhibition showcased pharmaceutical processing technologies, API manufacturing solutions, laboratory equipment, and contract manufacturing capabilities.

The event enhanced Bangladesh's global pharmaceutical visibility and facilitated international partnerships, investment opportunities, and export growth.

### FUTURE OUTLOOK AND STRATEGIC PRIORITIES

BAPI remains committed to strengthening policy advocacy, accelerating API Industrial Park development, promoting innovation and research, enhancing workforce capacity, expanding export markets, and fostering international partnerships.

The Association will continue to collaborate with government authorities and global stakeholders to ensure sustainable industry growth, improved healthcare access, and enhanced global competitiveness.

#### Conclusion

In 2025, BAPI played a pivotal role in representing the pharmaceutical industry, shaping policy frameworks, and strengthening industry capacity. The Association will continue its proactive engagement to support sustainable development of Bangladesh's pharmaceutical sector and contribute to national health security and economic growth.

**KSM Mostafizur Rahman**

Managing Director, One Pharma Ltd.

President,

The Bangladesh Agrochemicals Manufacturers Association (BAMA)

Executive Member,

Bangladesh Association of Pharmaceutical Industries (BAPI)

## **TIME HAS COME TO PRODUCE OUR OWN AGROCHEMICALS**

For decades, our agrochemicals sector has survived, not flourished. We remain heavily import-dependent. Policy support is fragmented. Coordination among ministries is weak. Foreign suppliers dominate. Local factories underperform. Farmers often pay more than they should.

If we are serious about reducing vulnerability, this must change now.

The data is alarming. In 2024, Bangladesh imported nearly 100,000 metric tons of pesticides, including sulfur. The total import value stood at around 500 million US dollars. The domestic market size is estimated at Tk 15,000 crore. Nearly 12,000 registered pesticide brands operate in the country. More than 1,000 importers are active in this sector. Yet only 22 are local manufacturers.

This imbalance exposes structural weakness. Under the World Trade Organization framework, the TRIPS Agreement granted Least Developed Countries special flexibilities. Our pharmaceutical industry used those flexibilities strategically. It invested, expanded, built strong formulation and technical capacity, and captured domestic and export markets.

The agrochemicals industry did not receive similar policy alignment. There was no long-term industrial roadmap. No calibrated tariff protection when local capacity existed. No integrated research linkage among universities, regulators and producers. No unified export push. Instead, finished products entered easily, often at low duties, while local producers faced higher input costs, procedural delays and policy uncertainty. This pattern entrenched import dependency.

Tariff barriers affecting local production remain contradictory. Finished pesticides often enjoy favorable duty structures. But raw materials and intermediates required for domestic formulation face cumulative costs. Local value addition becomes commercially unviable before production even begins. Source restrictions compound the problem. Only two approved sources are allowed for importing certain raw materials. This limits flexibility, reduces competition among suppliers and increases vulnerability in times of global disruption.

Procedural bottlenecks add further strain. Importers and manufacturers face lengthy delays in obtaining No Objection Certificates to release raw materials from ports. Delays translate directly into demurrage, higher costs and production uncertainty.

At the same time, although Bangladesh still enjoys LDC status, patent rights are being enforced in a way that has created monopoly-like market conditions in certain segments. The policy space available under LDC flexibilities is not being fully utilized in the interest of food security and domestic industry development. Institutional imbalance also persists. Despite representing manufacturers directly affected by these policies, BAMA does not have representation in the PTAC committee. Decisions are often taken without structured input from producers who operate factories on the ground.

We must correct the structure decisively. If Bangladesh receives extended time before graduating from LDC status, that extension must be treated as a final opportunity. Once we graduate, intellectual property enforcement will tighten. Policy flexibility will shrink. Competitive pressure will intensify. Entering that phase without strong domestic agrochemical manufacturing will lock us into long-term dependency. That would be a strategic failure.

Agriculture underpins our food security. Climate volatility is rising. Pest resistance is evolving. Farmers require timely, affordable and quality crop protection solutions. Excessive reliance on imports exposes us to global price volatility, currency shocks and supply chain disruptions.

Self-reliance means capability, not isolation. First, as decided in the inter-ministerial meeting at the Ministry of Commerce, the 32 auxiliary ingredients applied for by BAMA — essential for pesticide production — must be allowed zero import duty. This is not a subsidy. It is rational tariff correction to ensure competitive local manufacturing. Second, raw material sourcing must be liberalised. Following the recommendation of the Ministry of Law, multiple international sources should be approved for importing raw materials. Diversification will increase competition, reduce risk and improve supply stability.

Third, the mandatory NOC requirement at the time of port clearance for raw materials imported in the name of finished pesticide products must be removed. Regulatory oversight can continue through post-clearance monitoring and scientific evaluation. But port-level procedural delays should not paralyse industry.

Fourth, before LDC graduation, Bangladesh must explicitly allow the benefit of compulsory licensing in the public interest and for food security. This measure is consistent with international rules and essential to prevent monopoly concentration in critical agrochemical segments. Food security must remain paramount.

Fifth, as recommended by the Ministry of Industries, manufacturers — including BAMA representatives — must be included in relevant technical and advisory committees. Institutional representation ensures policy realism and accountability.

Sixth, broader tariff rationalisation must align finished product duties and raw material duties to support domestic value addition. Protection must be calibrated and temporary, aimed at capacity building rather than permanent shelter.

Seventh, financing support is necessary for expansion into technical-grade production and advanced formulation plants. Long-term credit at competitive rates will enable serious investment in backward integration.

Eighth, research collaboration must deepen. Universities, agricultural research institutes and industry should jointly develop locally suited formulations. Bangladesh's agro-climatic conditions are unique. Local innovation will enhance efficacy, reduce misuse and support environmental stewardship.

Ninth, export strategy must be integrated from the outset. South Asia and African markets share similar crop profiles and pest challenges. With quality assurance and regulatory harmonisation, Bangladesh can become a competitive regional supplier.

None of these reforms will happen automatically. The private sector stands ready to invest. Modern formulation plants already operate in the country. But investment decisions depend on policy consistency and fair competition. If import channels remain disproportionately advantageous, capital will hesitate. We must also reshape the public narrative. Agrochemicals are often viewed solely through risk. Responsible use and environmental compliance are non-negotiable. Yet a strong domestic manufacturing base enhances traceability, improves training integration and strengthens quality control enforcement.

Dependency diffuses responsibility. Domestic capability consolidates it. As Chairman of NAC Group and President of BAMA, I state clearly: incremental change is no longer sufficient. Super-active policy implementation must begin immediately. The domestic market is large. Tk 15,000 crore reflects real demand. Instead of allowing over 1,000 importers to dominate a market served by only 22 manufacturers, we must build balanced industrial capacity.

Bangladesh has transformed sectors before. Garments grew with coordinated policy and entrepreneurial drive. Pharmaceuticals leveraged TRIPS flexibilities to build global competitiveness. Agrochemicals can follow a similar path — but only with decisive alignment between policy and industry. The extension of LDC benefits, if granted, must be treated as a strategic grace period. Remove tariff distortions. Liberalise sourcing. Eliminate procedural bottlenecks. Ensure compulsory licensing where necessary. Guarantee manufacturer representation. Strengthen research and financing. Prepare for a post-LDC competitive scenario.

Otherwise, when policy space narrows, we will stand exposed. Food security is national security. Industrial capacity is economic sovereignty. Agrochemicals stand at the intersection of both. The choice is straightforward. Continue importing and deepen vulnerability. Or build domestic strength and secure our agricultural future. History will judge our resolve.

**Md. Saddam Nawaz**

Assistant General Manager, Quality Assurance  
ACI HealthCare Limited, Bangladesh

## **FROM GENERIC SUCCESS TO GLOBAL INNOVATION: THE NEXT STRATEGIC JOURNEY OF BANGLADESH'S PHARMACEUTICAL INDUSTRY**

### **A Moment Worth Pausing For**

Fifty-five years is a significant number in the life of any institution. But for an industry association like Bangladesh Association of Pharmaceutical Industries (BAPI), it represents something more than institutional longevity; it is a record of collective purpose. The Bangladesh pharmaceutical sector has been shaped, advocated for, and advanced by this community through periods of policy uncertainty, infrastructure constraints, and shifting global dynamics. This anniversary is therefore an occasion not only for acknowledgement, but for the kind of honest strategic conversation that only a mature industry can have with itself.

The achievements are real, and they deserve to be stated plainly. From near-complete import dependence before the Drug (Control) Ordinance of 1982, Bangladesh has built a pharmaceutical manufacturing base that today meets approximately 98 percent of domestic medicinal demand and exports to more than 160 countries. Export earnings reached approximately USD 213 million in FY2024–25. Several leading companies carry regulatory approvals from the US FDA, UK MHRA, EU GMP authorities, and WHO Prequalification programs. A workforce of thousands of scientists, pharmacists, chemists, engineers, and quality professionals has been built, largely from within the country's own educational institutions.

That is a foundation of genuine substance. It is also a foundation that now needs to support a very different kind of structure than the one it was originally built to hold.

### **The Landscape Has Shifted**

The global pharmaceutical market valued by IQVIA at approximately USD 1.6 trillion has changed fundamentally in the years since Bangladesh's industry found its footing. Conventional generic manufacturing, which gave this sector its initial momentum, remains commercially important. But it is no longer the primary arena of global pharmaceutical competition. The industry's strategic center of gravity has moved toward biosimilars, complex drug delivery systems, specialty formulations, and precision therapeutics - product categories that demand scientific depth, advanced analytical capability, and regulatory sophistication well beyond what standard generic manufacturing requires.

Simultaneously, the regulatory environment governing international pharmaceutical trade has become more exacting. The US FDA, the EMA, the UK MHRA, and WHO Prequalification no longer evaluate manufacturers primarily on the adequacy of their standard operating procedures. They assess the maturity of the entire quality management ecosystem, how deviations are investigated, how data is generated and protected, how management responds to systemic problems, and whether the organizational culture supports or undermines the integrity of the quality management system (QMS).

For Bangladesh, there is a specific and time-bound dimension to all of this. The country's scheduled graduation from Least Developed Country (LDC) status in November 2026 will gradually reshape the preferential trade and policy arrangements that have supported the industry's export expansion. The intellectual property (IP) environment will become more demanding. Competition from established pharmaceutical manufacturing nations India, China, and several others will not diminish. If anything, it will intensify as those markets too invest in moving up the value chain. The window for deliberate preparation is open, but it will not remain so indefinitely.

### **Quality Is Not a Department**

There is a conversation that happens frequently within Bangladesh's pharmaceutical industry about regulatory approvals pursued, inspections passed, certifications obtained. These are meaningful accomplishments. But there is a more difficult conversation that is needed alongside it: about the difference between compliance and culture, and about why that difference is now commercially decisive.

The US FDA's 2018 guidance on data integrity was not a procedural update. It was a statement of regulatory philosophy: that the reliability of a pharmaceutical product is only as credible as the integrity of the data that describes it. Manipulated analytical results, backdated records, and selectively presented information do not merely create regulatory risk; they undermine the scientific foundation upon which quality assurance rests. Regulators have communicated this message through warning letters, import alerts, and inspection observations with increasing consistency across the global industry, including in markets that supply Bangladesh's export destinations.

Building genuine quality culture means something specific. It means organizations where quality professionals carry real authority, not just formal titles. It means management that treats a deviation report as valuable information rather than an inconvenient obligation. It means training that changes behavior rather than fills attendance registers. And it means senior leadership that is visibly, consistently, and credibly committed to quality not as a function to be managed, but as a value to be demonstrated. The ICH Q10 Pharmaceutical Quality System framework provides the structural model. What brings it to life is leadership will.

Bangladesh has companies that have achieved this standard. The task now is to make that standard the expectation of the industry as a whole, not the distinction of a few.

### **Technology, Innovation, and the Products of Tomorrow**

Digital transformation in pharmaceutical manufacturing increasingly described as Pharma 4.0 is no longer a future consideration. It is a present competitive requirement. Electronic batch records (EBR), manufacturing execution systems (MES), laboratory information management systems (LIMS), and

process analytical technology (PAT) are reshaping how leading manufacturers control quality, manage data, and respond to regulatory scrutiny. Artificial intelligence (AI) is beginning to be applied meaningfully in process optimization and quality signal detection. These capabilities are operational realities in the markets that Bangladesh seeks to access, and companies that cannot demonstrate comparable governance of their manufacturing data will face growing barriers to entry.

The innovation opportunity, however, extends well beyond digital systems. Biosimilars represent one of the most strategically significant product categories of the coming decade driven by the patent expiry of major biologic medicines and growing global demand for affordable alternatives. Complex generics with challenging bioequivalence requirements, modified-release formulations, long-acting injectables, and specialized drug delivery technologies all offer routes to competing on scientific value rather than unit cost alone. These are not unreachable ambitions for Bangladesh. The scientific talent exists. What is required is deliberate investment in formulation research capability, analytical development infrastructure, and the industry-academic partnerships that make sustained innovation possible.

Bangladesh also has a genuine and underexploited opportunity to position itself as a credible contract manufacturing partner for global pharmaceutical companies. The CDMO model offering development and manufacturing services to international originators and generic companies; is a high-value pathway that leverages existing manufacturing capability while building regulatory credentials and international relationships that strengthen the entire export platform. Realizing this opportunity, however, requires the same foundation: robust quality systems, strong regulatory approvals, and the organizational reliability that global partners require before they place their products in another company's hands.

### **What the Next Decade Requires**

The path forward for Bangladesh's pharmaceutical industry is not unclear. What it demands is the discipline to prioritize consistently and the courage to invest in capabilities whose returns are measured in years rather than quarters.

Quality culture must be treated as a senior leadership responsibility not delegated to quality departments and reviewed at audit time. Regulatory science capability must be built as a strategic asset, with investment in professionals who understand the scientific basis of regulatory expectations, not merely their procedural requirements. Digital transformation must be pursued under rigorous governance and validation frameworks, not as an IT project but as a quality management transformation. Research and development (R&D) investment must increase, supported by national policy that creates genuine incentives for applied pharmaceutical science. And the relationship between industry and academia must become more structured, more sustained, and more strategically directed.

The companies that make these investments over the next five years will define what Bangladesh's pharmaceutical industry looks like in 2035. The companies that do not will find themselves competing in an increasingly crowded and price-pressured generic space, without the differentiation that commands access to higher-value markets.

## The Industry We Are Capable of Building

Bangladesh's pharmaceutical community has demonstrated, across more than four decades, that it can build what others said could not be built. The 1982 Drug Ordinance was dismissed by some as an act of industrial over-ambition. What it produced was an industry that today is a source of national pride, a contributor to global healthcare access, and a platform for economic development that has created skilled employment for hundreds of thousands of people.

The 55th Annual General Meeting of BAPI is an appropriate moment to acknowledge that achievement and to commit, with equal seriousness, to the next one. The global pharmaceutical landscape will not wait for us to feel ready. The regulatory bar will continue to rise. The competitive pressure will continue to intensify. And the opportunity to build something genuinely world-class from the foundation that this community has already laid will not remain open indefinitely.

We have proven, beyond reasonable doubt, that we can build. The question this anniversary asks of us is a more demanding one: are we prepared to innovate, to lead on quality, to invest in science, and to earn the trust of the world's most exacting regulators and customers not as an aspiration, but as an industry standard?

I believe the answer is yes. But belief alone is not a strategy. The work begins now.

**Md. Saiful Islam**  
Executive Director  
Bangladesh Association of Pharmaceutical Industries (BAPI)

## **ARTIFICIAL INTELLIGENCE IN BANGLADESH'S PHARMACEUTICAL INDUSTRY: OPPORTUNITIES, BENEFITS, AND GLOBAL LESSONS**

Bangladesh's pharmaceutical industry has emerged as a strategic pillar of the national economy, supplying the vast majority of the country's medicines and gradually expanding into international export markets. The sector consists of 250+ licensed pharmaceutical manufacturers and supplies about 98% of domestic medicine demand, while exports continue to grow across Asia, Africa, and selected European markets. In this evolving environment, Artificial Intelligence (AI) presents transformative opportunities for improving efficiency, innovation, and competitiveness throughout the pharmaceutical value chain. Many companies currently focus their research and development on formulation improvement and process development rather than novel drug discovery, and the integration of advanced digital technologies such as AI remains limited but promising.

AI offers significant benefits in drug discovery and drug repurposing by analyzing large biochemical, genomic, and clinical datasets to identify promising drug candidates. For countries like Bangladesh, where research budgets may be limited, AI can help reduce dependence on costly laboratory experiments and accelerate research targeting diseases of national importance such as Dengue Fever and Tuberculosis. Internationally, AI has already demonstrated its potential in pharmaceutical research. For example, the biotechnology company Insilico Medicine successfully used AI to design a drug candidate in a significantly shorter time compared to traditional discovery methods, highlighting how AI can dramatically accelerate pharmaceutical innovation.

In pharmaceutical manufacturing, AI-driven predictive analytics and IoT-enabled monitoring systems can improve operational efficiency by predicting equipment failures and optimizing production processes. By collecting real-time data from machines, AI algorithms can identify early signs of mechanical issues, helping companies avoid costly downtime and maintain consistent production quality. Large Bangladeshi pharmaceutical companies such as Beximco Pharmaceuticals and Square Pharmaceuticals have already begun adopting digital manufacturing and automation systems that could be further enhanced with AI-powered predictive maintenance. Internationally, companies like Pfizer use predictive analytics to monitor production equipment and improve manufacturing reliability.

AI is also transforming pharmaceutical quality control through computer vision technologies that automatically inspect tablets, capsules, vials, and packaging for defects. These systems can detect irregularities much faster and more accurately than manual inspection, ensuring compliance with Good Manufacturing Practices and reducing the risk of product recalls. For instance, the global pharmaceutical

company Novartis has implemented AI-based visual inspection systems within its manufacturing lines to enhance product quality and regulatory compliance.

Another important area where AI can provide benefits is supply chain management and demand forecasting. By analyzing historical sales data, seasonal disease trends, and epidemiological information, AI systems can predict medicine demand more accurately and optimize inventory levels. This capability can help pharmaceutical companies reduce stock shortages and minimize losses caused by expired medicines. In Bangladesh, integrating disease surveillance data from the Directorate General of Health Services could enable pharmaceutical distributors to anticipate demand spikes for medicines used to treat seasonal diseases such as Dengue Fever. Globally, companies such as Johnson & Johnson already utilize AI-powered supply chain analytics to manage complex pharmaceutical distribution networks more efficiently.

AI can also significantly improve pharmacovigilance by analyzing large volumes of medical reports, scientific literature, and patient feedback to detect potential adverse drug reactions. Natural Language Processing technologies can automatically scan and interpret safety reports, allowing pharmaceutical companies and regulators to identify safety signals much earlier. In Bangladesh, the national regulator Directorate General of Drug Administration could adopt AI-based pharmacovigilance platforms to strengthen drug safety monitoring and improve regulatory decision-making. International pharmaceutical companies such as Roche already use AI tools to process large volumes of safety data and enhance global pharmacovigilance systems.

Despite the clear benefits, several challenges continue to limit the adoption of AI within Bangladesh's pharmaceutical sector. Many companies still rely on legacy data systems and manual record keeping, resulting in limited availability of structured datasets required for effective machine learning models. Additionally, there is a shortage of professionals who possess both pharmaceutical expertise and advanced data science skills. Infrastructure limitations, including inconsistent cloud adoption and limited high-performance computing resources, also pose barriers to implementing advanced AI solutions. Furthermore, regulatory frameworks for validating AI-based tools in pharmaceutical processes are still developing under the oversight of the Directorate General of Drug Administration, and companies often hesitate to invest in expensive technologies without clear regulatory guidelines or guaranteed returns on investment.

Looking ahead, Bangladesh has significant opportunities to leverage AI for strengthening its pharmaceutical industry. The country has a growing information technology sector, a large domestic healthcare market, and an established generics manufacturing base that can benefit from digital transformation. Strategic collaboration between pharmaceutical companies, universities, and technology firms could foster innovation and build specialized AI solutions tailored to local healthcare challenges. With proper government support, investment in digital infrastructure, and development of skilled professionals, AI could help more Bangladeshi pharmaceutical manufacturers achieve international regulatory standards such as WHO GMP and expand into higher-value global markets.

In conclusion, Artificial Intelligence has the potential to transform Bangladesh's pharmaceutical industry by improving research productivity, manufacturing efficiency, product quality, supply chain management, and drug safety monitoring. By integrating AI technologies into pharmaceutical operations and strengthening collaboration between industry, government, and academic institutions, Bangladesh can enhance its global competitiveness, expand export opportunities, and ensure affordable access to high-quality medicines for its population.

# EXHIBITORS' PROFILE

Advanced Expertise Technology Pvt Ltd (AETPL), established in 2004 and headquartered in Mumbai, India, is a leading provider of high-precision industrial solutions specializing in the pharmaceutical, chemical, and allied sectors. With over a decade of experience, AETPL combines advanced technology, skilled engineering, and innovative methodologies to deliver customized solutions that meet the highest quality standards.

AETPL's core competencies include:

**Fluoropolymer Coatings & Linings:** Specialized in HALAR, PVDF, ETFE, PFA, PTFE coatings for equipment such as reactors, tanks, valves, filters, and agitators, ensuring corrosion resistance and enhanced equipment longevity.

**Pharmaceutical & Process Machinery:** Design, supply, and maintenance of machinery like Nutsche filters, centrifuges, dryers, and mixers tailored for process efficiency and compliance with regulatory standards.

**Custom Engineering Solutions:** End-to-end project management from conceptual design to installation, with a focus on quality, safety, and regulatory compliance.

Airtech Systems India Pvt. Ltd is a market leader in the TURNKEY Solutions for Pharmaceutical Projects in the Global Arena. Our personnel are trained and experienced in pharmaceutical construction, keeping an awareness of contamination control to maintain the highest standards as they relate to pharmaceutical products, production and validation.

Our decades of experience in pharmaceutical environments, combined with the dedication of our field and office staff, make AIRTECH the professionals to call for, for TURNKEY PHARMACEUTICAL projects. Our turnkey cleanroom pharma solutions cover every aspect of project management, ensuring a seamless and efficient process from inception to completion. Specializing in project management conceptualization, master planning, and detailed engineering design, our dedicated team collaborates closely with you to develop bespoke strategies and meticulous plans tailored to your specific needs and objectives.

In addition to comprehensive planning and design services, we offer expert manufacturing, execution and site

management, along with design, supply, installation & commissioning services. Our holistic approach ensures the successful execution of your cleanroom projects, from initial concept to final validation, guaranteeing superior quality and client satisfaction at every phase.

We strictly adhere to stringent international standards and regulatory requirements, including those mandated by US-FDA, EU GMP, TGA, WHO & PICS, and local FDAs. This commitment ensures that our cleanroom pharma solutions consistently meet the highest industry standards, delivering exceptional quality and compliance.

From design to commissioning, we've got you covered.

Innovation and efficiency

Alven strengths lie in the development of highly complex molecules, technological leadership and efficiency in production

More than R&D

All our R&D work is driven by basic rule – the result of the laboratory work leads to technologically suitable and highly efficient processes for commercial production

New cGMP production facility

Ultimate emphasis on technological efficiency and optimised synthetic processes allow cost leadership combined with environmental sustainability

Setting standards in QC / QA

Innovative and proactive approach which ensures that product and corresponding analytical and regulatory services meet all pending requirements in changing regulatory environment

Partners Benefits

Reliability, flexibility, quality, combined with cost leadership are the reasons for satisfaction of all our partners in the custom manufacturing and development projects

Own developments

Alven's understanding of market needs and pharma industry's trends combined with strengths in R&D, technology transfer and production build a strong base for fast growing API portfolio

Alven product portfolio underlines the company's focus on segment of rare diseases and complex API's. Alongside with its own product portfolio, Alven strength lies in custom development and production of demanding API's and intermediates.

ROAD DEHKORA, VILLAGE ROHAD

BAHADURGARH

HARYANA 124501 INDIA

E: info@alutechpackaging.com

W: www.alutechpackaging.com

Founded in 2010 by the visionary entrepreneurs Mr. Anil H. Mittal and Mr. Rakesh Goel, Alutech Packaging Pvt. Ltd. set out to revolutionize the pharmaceutical packaging industry through innovation, quality, and precision. Our journey began as India's first successful manufacturer of Alu Alu foil (cold forming blister foil), operating from a compact 5,000 sq. ft. manufacturing unit in the Badli Industrial Area, Delhi, with a small but dedicated team of five individuals.

Despite these modest beginnings, Alutech quickly established a strong foundation built on quality, customer satisfaction, and reliability. As the demand for high-quality pharmaceutical packaging grew, so did our capabilities. A significant milestone was achieved in 2015 with the inauguration of our state-of-the-art manufacturing facility in Bahadurgarh, Haryana. Equipped with an initial production capacity of 1,000 MT, this facility allowed Alutech to expand its product offerings, particularly in foil-based packaging solutions for single-dose pharmaceutical forms.

Continuing our path of growth and innovation, Alutech launched its second manufacturing unit in February 2022 at Baddi-Nalagarh, Himachal Pradesh. This expansive facility, spread across 12 acres and encompassing approximately 500,000 sq. ft., boasts an impressive annual production capacity of 30,000 MT. Designed to comply with ISO, USFDA, and European standards, this unit underscores Alutech's commitment to global quality benchmarks and our ability to efficiently serve both domestic and international markets.

In 2020, Alutech achieved another significant breakthrough by developing India's first Desiccant Cold Forming Foil. This innovation reduced our reliance on international supplies, offering a cost-effective solution with shorter lead times.

Today, Alutech Packaging Pvt. Ltd. is a trusted partner for pharmaceutical companies across India and overseas. We are recognized for our unwavering focus on innovation,

# EXHIBITORS' PROFILE

consistency, and the delivery of world-class packaging solutions.

## Our Mission

Our mission is to provide innovative, high-quality, and sustainable pharmaceutical packaging solutions that ensure product integrity, safety, and compliance. We are committed to leveraging advanced technology and industry expertise to deliver excellence, protect patient health, and support the evolving needs of the pharmaceutical industry. We are dedicated to serving the pharmaceutical industry with cutting-edge packaging materials that not only protect medicines but also enhance their shelf life and usability.

At the heart of our mission is a deep responsibility toward patient safety and environmental sustainability. We aim to reduce our ecological footprint by implementing eco-friendly packaging solutions that align with global sustainability goals. Through continuous innovation, customer-centric service, and operational excellence, we aspire to be a trusted partner for pharmaceutical companies worldwide, ensuring that their products reach consumers in the safest and most efficient way possible.

facility is approved by EDQM and WHO-PQ and has Eu-GMP, Local-GMP and other such certifications.

We also have an exclusive tie-up with Great Pacific Exports Pvt. Ltd. located at Navi Mumbai for manufacturing of Corticosteroids. The manufacturing facility at Navi Mumbai is also a state of the art facility built and complying to latest ICH - GMP Guidelines.

The manufacturing facility consists of 6 Independent Manufacturing Blocks and 2 Separate Airjet Milling Rooms. The total installed reactor capacity is more than 75 KL with Stainless Steel and Glass Lined Reactors. The production areas have dedicated men and material movement passages, and each manufacturing block has dedicated clean corridors and airlocks.

#### Production Area

Each manufacturing block has 2 synthesis areas and 1 powder processing area. The synthesis areas have Forced Draft Filter air filtered through 5 Micron filters. The powder processing area have HEPA Filters and is temperature controlled. Reaction capabilities include condensation, hydrolysis, substitution, esterification, and other chemical reactions required for manufacturing Active Pharmaceutical Ingredients. The manufacturing area is supplied with Purified Water via a Loop System built as per ICH-GMP Guidelines.

#### Warehouse

The warehouse is equipped with 2 dedicated hoists for transfer of Raw Materials, Packing Materials and Finished Product. The entire passage of the warehouse is supplied with Forced Draft Ventilation. The Raw Materials and Finished Products are stored in dedicated rooms with Temperature Control and Monitoring.

#### Quality Control

The manufacturing facility is also supplemented with a well equipped Quality Control Laboratory which has state of the art equipment like HPLC, GC, FTIR etc. which are required for all kinds of pharmacopoeial analysis. A separate microbiology section with primary and secondary change rooms and Laminar Airflow unit is provided for carrying out microbiological analysis.

#### Environmental Management

The manufacturing site adheres to its commitment to the environment by treating the effluent generated by the site within the prescribed norms before discharging the same to the centralised effluent treatment plant. To this effect a Solvent Stripping and Recovery System and a Effluent Treatment Plant has been installed and is operated and monitored on daily basis.

### PRODUCTS / SERVICES:

Bangladesh Association of Pharmaceutical Industries (BAPI) was established in 1972 with 33 member pharmaceutical companies. Today, BAPI has as good as more than 190 pharmaceutical companies as its members.

BAPI is the one and only registered and recognized association of the Pvt. sector pharmaceutical companies of Bangladesh. BAPI has been enrolled as member of International Federation of Pharmaceutical Manufacturers Association (IFPMA), Geneva. Though its major activities include upholding interests of the pharmaceutical manufacturers of Bangladesh to the relevant forums, in last few years BAPI also organized various health awareness

programs, campaigns, against spurious drugs, export potentials & problems in Bangladesh etc.

In year 2003, BAPI organized first ever an international pharma exhibition of Bangladesh, ASIAPHARMA EXPO 2003 – one of the major pharma event / exhibition held in this region. In year 2005 / 2007 / 2009 / 2011 / 2013 / 2015 / 2016 / 2017 / 2018 / 2019 / 2020 / 2022 / 2023 highly successful repetition of the ASIA PHARMA EXPO shows helped Bangladesh to be recognized as one of the important location to trade for the pharma segment.

ASIA PHARMA EXPO shows attracted most of the largest stake – holders of pharma and associated industry of Asia & Europe. Apart from these events and campaign programs, BAPI is also involved in various social activities, like donation of medicines to various hospitals, flood-affected people, cyclone relief fund both home & abroad. In Bangladesh, Pharmaceutical is one of the fastest growing sectors. In Yr.2004, the total size of the pharma market of Bangladesh was estimated to be Taka30,000 million with an annual growth rate of about 10%. The pharma industry in Bangladesh is paying the second largest revenue to the Government's exchequer. BAPI's member firms are meeting 97% of the total demand of pharmaceuticals. Besides catering to local demand Bangladesh is also exporting its formulations to more than 90 countries of the world and demand for export is increasing rapidly. Bangladesh Pharmaceutical Industry is now heading towards self – sufficiency in pharmaceuticals.

Corel Pharma Chem, located in Ahmedabad, is a first company in Asia and second in the world to manufacture Methacrylic based specialty polymers for pharmaceutical applications.

Corel made its beginning with Acrycoat series for application in pharmaceutical industry as enteric coating and sustain release polymers in the year of 1990. Subsequently, Corel widened its dimension and horizon by introducing series of product range to cater Pharmaceuticals and Nutraceuticals.

Our key product portfolio includes:

- Acrycoat® – Methacrylic acid copolymers
- Colorcoat® – Ready-to-use coating systems
- Kyron® – Ion exchange resin for taste masking of bitter API's
- Kyron® T-314 – Polacrilin potassium
- Nutraccoat® – Natural coating polymer
- Acrypol® – Carbomer / Acrylates copolymers
- Acrysol® – Castor oil derivatives
- Acryflow® – Hydrogenated castor oil

Corel technical service support includes our State-of-Art technical service lab at Corel head office -Ahmedabad where team of scientists work rounds the clock to provide customer service support in Pharmaceutical and Nutraceutical applications.

Our facility complies to EXCiPACT, EffCI, ISO 9001:2015 and CTPAT. Similarly the products are accredited to USDMF, CFDA. REACH, HALAL and KOSHER.

Integrated Turnkey Solutions for Pharmaceutical and Biotech Facilities

### About Us

FARCLEAN Technology Global Co., Ltd. is an internationally recognized engineering and manufacturing company providing comprehensive solutions for high-tech pharmaceutical, biotechnology, and healthcare facilities. Established in 2002 and headquartered in Suzhou, China, we offer end-to-end services — from consulting, engineering design, and construction management to GMP validation and after-sales support.

### Our Expertise

We specialize in the design and construction of cleanroom environments and manufacture a full range of cleanroom products, including sandwich panels, cleanroom doors, windows, modular ceilings, and system accessories. Our four modern production plants, covering over 30,000 square meters, ensure superior product quality and flexibility for customized requirements.

### Key Capabilities

- With two decades of proven strength in manufacturing and material supply, FARCLEAN brings its trusted craftsmanship into the project sector — Blending experience with innovation.
- Integrated BIM-based design and construction system
- Proven references across Asia, the Middle East, Africa, and Europe
- Comprehensive GMP validation and compliance services
- Strong supply chain and project management resources

### Our Commitment

Guided by the values of Integrity, Customer Focus, and Innovation, FARCLEAN strives to deliver cost-effective, sustainable, and high-quality engineering solutions that exceed client expectations.

Creating Value Through Innovation and Quality Engineering.

With an annual production capacity of 30,000 MT, we proudly serve over 1,000 customers across 25 countries, catering to diverse industries including Pharmaceuticals, Food, Nutraceuticals, Toothpaste, and Cosmetics.

Our state-of-the-art cGLP laboratory ensures rigorous physio-chemical and microbial testing, maintaining the highest product quality and compliance standards.

At GANGOTRI, sustainability is integral to our operations: Solar Energy: Our rooftop solar plant reduces 475,000 kg of CO<sub>2</sub> emissions annually.

Green Plantation: We maintain 10,000 sq. meters of green area within our premises, generating approximately 15,000 kg of oxygen per year.

We would be delighted to explore opportunities for collaboration and share how our high-quality mineral-based ingredients can add value to your products and supply chain.

Our years of experience in Bangladesh Pharmaceutical Industry have provided us with exposure to numerous challenges associated with Pharma fields. This exposure has helped to devise tailor made approaches to find solutions to each one of them in a timely fashion.

We know the trends of the industry & continue to update our 'modus-operandi' through innovative approaches to stay ahead of our competitors. Our customer-oriented approach is being the key factor of our growth.

Quality of the marketing team plays an integral role in growing our enterprise as well as fulfilling the day to day needs of valued customers. Strong financial base as well as the management in able hands of qualified directors, assisted by collaborative organizational leadership, has helped us sustain solid marketing presence.

We at Global Process Solutions Ltd. work closely with local pharmaceutical, food & cosmetic manufacturing companies and understand various aspects of their needs. Our access to the executive levels of private companies and governmental institutions is an asset to market-entry for the products we handle. Close ties, professional rapport with key consultants, pharmacists and decision makers in the industry have enhanced our capability in delivering successful results.

HANGZHOU 310003 CHINA

E: sales1@tianweipharm.com

W: www.tianweipharm.com

"Hangzhou Tianwei Pharmaceutical Co., Ltd. is located in Qianjiang New Town, close to the beautiful West Lake, with convenient transportation. The company mainly deals in pharmaceutical chemicals. While exporting, it has been committed to the import business of various pharmaceutical intermediates and API.

The main reasons for focusing on the development of import business are as follows:

1. The domestic environmental protection pressure is great, and the production of many products with dangerous processes and high pollution is restricted. In addition, India's pharmaceutical intermediates have been extended to the front in recent years, increasing the possibility of imports from India.

2. Some products are resource-based, such as bromine and certain plant extracts, etc. These products and downstream products have advantages over domestic ones.

The import advantages of the company are below:

1. Focusing on import for many years, we have rich experience in finding suppliers and quickly establishing cooperation.

2. We have in-depth cooperation with several foreign factories for many years and can quickly realize the transformation of new products from scratch to large-scale production.

With the efforts of our team, we have achieved good results in the import of intermediates such as gum rosin, pantoprazole, ketoconazole, and ambroxol. Many products have signed exclusive agency agreements with advantageous foreign manufacturers, and have also become long-term suppliers of some excellent domestic pharmaceutical companies.

The company adheres to the principle of "integrity-based, mutual benefit and win-win", customer-centric and market-oriented; with a dedicated attitude, professional talents and professional knowledge, we take every customer and project seriously, so that customers can enjoy excellent cost-effective services. Fully consider the interests of all parties, so as to achieve a win-win situation for foreign factories, domestic customers and our company.

#### About Us:

Heer Trade International is a premier supplier of pharmaceutical materials founded in 2025. We specialize in providing high-quality pharmaceutical raw materials, packing materials, coating materials, die- punch & machinery to pharmaceutical manufacturers worldwide. With a commitment to excellence and quality, we have established ourselves as a reliable partner for pharmaceutical companies seeking consistent and superior materials for their production needs. Our extensive network of suppliers and manufacturers allows us to offer competitive pricing without compromising on quality.

At Heer Trade International, we understand the critical nature of pharmaceutical manufacturing and the importance of timely delivery, consistent quality, and regulatory compliance. Our team of experts works tirelessly to ensure that all products meet the highest industry standards and regulatory requirements.

Our comprehensive range of products meets the stringent requirements of the pharmaceutical industry, ensuring that our clients receive materials that comply with international quality standards. At Heer Trade International, we understand the critical nature of pharmaceutical manufacturing and are committed to supporting our clients with superior products and services.

#### Our Mission:

Our mission is to provide exceptional quality pharmaceutical supplies that meet the highest industry standards while ensuring reliability in every aspect of our business operations.

We are dedicated to fostering strong relationships with our clients through transparent communication, consistent product quality, and responsive service. We strive to exceed customer expectations by understanding their specific needs and delivering solutions that enhance their manufacturing processes and product outcomes.

Customer satisfaction is at the core of everything we do, driving our commitment to continuous improvement and excellence in all our endeavors.

#### Our Vision:

We aspire to become a leading global supplier in the pharmaceutical industry, recognized for our unwavering commitment to quality, innovation, and customer service.

Our vision encompasses expanding our product portfolio to meet evolving industry needs while maintaining the highest standards of product quality and service excellence. We aim to build lasting partnerships with pharmaceutical manufacturers worldwide, contributing to the advancement of healthcare through reliable supply chain solutions.

By investing in sustainable practices and cutting-edge technologies, we strive to set new benchmarks in the pharmaceutical supply industry while creating value for all our stakeholders.

Huarong (Guangdong) Pharmaceutical Co., Ltd. was established in 2023. It is a new type of chemical enterprise

integrating scientific research, production and supply. Its main customers are located in Southeast Asia, the Middle East, India, Africa and other countries.

Huarong (Guangdong) Pharmaceutical Co., Ltd. has its own chemical product production park, with more than 100 employees and an office, R&D, warehousing area, laboratory and workshop covering more than 30,000 square meters. Jointly built by Huarong Pharmaceutical and Laos United Pharmaceutical, it is located in the Laos Saysettha Comprehensive Development Zone.

It is the first biosynthetic API production workshop in Southeast Asia that meets international standards, covering an area of over 1,000 square meters, with a total investment of more than 30 million yuan and an annual production capacity of 370 tons (including key categories such as antibiotics and anti-tumor drugs). As the largest comprehensive pharmaceutical enterprise in Laos and a leading one in Southeast Asia, its headquarters is located in the Saysettha Development Zone in Vientiane, covering an area of 7.3 hectares. It has a complete preparation production system and a sales network covering ASEAN, accounting for 27% of the Lao pharmaceutical market, with an annual output value of 300 million yuan.

After the new factory is put into operation, the annual output value is expected to exceed 5 billion yuan, and it has strong local resource integration capabilities and market influence.

Imperial Corporation Ltd. was established and registered in 1985 as a Trading house engaged in representing foreign manufacturers and suppliers in the field of Pharmaceutical Machinery, Intermediates and Quality Control Equipments. Since Incorporation our company has one single purpose; that is, to identify and satisfy our customer's needs in an efficient, helpful and enthusiastic way.

This fundamental business philosophy has rewarded us with growth and man power resource to staff our current organizational structure to provide an extensive range of products and services to maintain high levels of service to those we serve.

We represent many world-renowned companies such as, Bellimed AG Switzerland, Sartorius Germany. Optrel Italy, GDN Italy, Cavallo Italy N.R. Industries Co. Ltd Thailand, Utopia – Aire Pte. Ltd, Countec South Korea, Hoonga Korea, F.D. Taiwan, PTK korea, Evercool Hong Kong, Sunscape China etc.

Through careful research, development, business planning and staff training, we have today established a solid business foundation. We have also organized our company to serve the market in the most resource efficient way and have achieved an effective administrative support system to coordinate our entire business activities.

We have a team of factory trained Engineers to take all kinds of engineering jobs for autoclaves / sterilizers, production machinery, utilities plant etc. Our Engineers received training in many European countries like Netherlands, UK, Germany, Spain, Italy, Belgium and some Asian countries like Korea, Japan, Thailand and Taiwan. We have in-house service center to take care of all kinds repair, service & calibration requirements. We have our reputation for prompt spares supply together with efficient and timely engineering service.

We offer exclusive turn key solution for Pharmaceutical Clean Room - Design, Construction, Installation and Validation together with supply of Panel System, HVAC system, Equipments, Machinery & Utilities Plant. We also undertake supply and installation of Special Utilities like Purified Water, Water for Injection & Pure Steam.

Our sister concern Imperial Tech Ltd. is manufacturing and supplying world class products like Clean Room Light Fixtures, Industrial Doors & Windows, Conveyor Belt, Dry Heat Chambers, Tanks and Vessels etc.

We have a defined mission for the future and are preparing ourselves accordingly. We also intend to maintain our market leader position in Bangladesh.

PHARMA EXPO | LAB EXPO

capsules, lyophilized injections, vaccines, and biotech products.

The company's divisions spanning Vaccine, Animal Vaccine, Hygiene, Hospicare, Herbal and Nutricare and Chemical showcase its dedication to addressing diverse healthcare needs. Notably Incepta pioneered vaccine production in Bangladesh and established a cutting-edge biotech facility.

In response to the country's healthcare demands Incepta manufactures a variety of products, from Hormonal and Hygiene items to Animal Healthcare and Herbal & Nutricare products. The introduction of locally manufactured biotech products insulin, biosimilars and monoclonal antibodies reflects its commitment to technological advancement.

Incepta's global reach spans Asia, Africa, Europe, North America, and Latin America with over 400 products exported to 96 countries. The company holds GMP certifications from UK-MHRA, Germany and Health Canada with products registered in the UK making it a pioneer for Bangladesh.

A noteworthy achievement in 2020 was WHO Prequalification for Medroxyprogesterone Acetate Suspension for Injection marking Incepta as the third globally to attain this recognition. Actively engaged in global expansion the company seeks partnerships for distributorships, contract manufacturing and government tenders. Incepta's vision includes ensuring a worldwide presence while prioritizing the production of high-quality, cost-effective healthcare solutions.

We specialize in delivering integrated smart packaging solutions to global customers across the pharmaceutical, health supplement, personal care, food, and electronics industries.

Guided by the principle that “True Change is Driven by Innovation,” we channel our creativity into advanced research in engineering materials, packaging design, industrial software, and information technology. With R&D centers in Bologna, Italy, and an Engineering Technology Research Center in China, Pharmapack merges world-class industrial design with cutting-edge smart packaging systems.

# EXHIBITORS' PROFILE

We are proudly contributing to the vision of "Industry 4.0" within China's smart manufacturing landscape.

Innovate to Advance. Every leap at Pharmapack springs from relentless transformation and technological evolution. To meet dynamic market demands, we have developed three flagship product series: the Smart Bottle Packaging Line, the Smart Inspection Packaging Line, and the Smart Flexible Packaging Line—supported by a comprehensive range of ancillary machinery. Equally recognized are our software systems, which enable online monitoring, real-time defect detection, and full track-and-trace capabilities. These solutions address critical industry pain points: shortening production cycles, reducing costs, ensuring consistent quality, and streamlining management.

Through our 5G+ digital cloud platform, we offer lifecycle management for packaging equipment, supporting lean production and helping customers transition toward fully automated, digitalized, and visually intelligent factories.

Our drive comes from our customers' challenges. Focusing on their operational needs pushes us to break new ground and redefine possibilities. We have grown into an innovation partner for our customers and because of them. None of this would be possible without the trust and dedication of our talented team, loyal customers, collaborative partners, and supportive friends.

Romaco is a leading international supplier of processing and packaging equipment specialising in engineering technologies for pharmaceutical solids. The Romaco Group provides individual machines, lines and turnkey solutions for manufacturing and packing powders, granulates, pellets, tablets, capsules, syringes and medical devices. The company also serves the food and chemical industries. Through its various technologies, Romaco is committed to sustainable production and to systematically reducing CO2 emissions.

The Romaco Group has its headquarters in Karlsruhe (Germany) and is part of the TruKing Group, a globally operating high-tech enterprise based in Changsha (China). TruKing's core competency is handling and filling pharmaceutical liquids.

Romaco operates from five European business sites with a broad portfolio comprised of seven established product brands. Noack and Siebler (Karlsruhe, Germany) supply blister, heat-sealing and rigid tube filling machines. Macofar (Bologna, Italy) markets technologies for filling sterile and non-sterile powders and liquids. Promatic (also Bologna, Italy) specializes in cartoners, track & trace systems and case packers. Kilian (Cologne, Germany) is a leading manufacturer of tablet presses. Innojet (Steinen, Germany) is in the business of granulating and coating fine solid particles. Tecpharm (Rubí, Spain) offers tablet coating technologies. More than 800 highly skilled and committed Romaco employees are dedicated to the development of future product technologies and to the continuous implementation of internal improvement processes. Romaco's multi-brand system solutions are sold worldwide through eight Sales & Service Centres and a dense network of local agent organisations. Over 12,000 installations delivered by Romaco are currently in use in more than 180 different countries.

Shandong Jingheng Yuxin Medical Equipment Co., Ltd. is headquartered in Zibo, Shandong Province, People's Republic of China. As a high-tech enterprise, we specialize in the research, development, manufacturing, and global distribution of disinfection, sterilization, and pharmaceutical equipment. Our operations are underpinned by CE and ISO certifications, reflecting a commitment to rigorous quality, safety, and performance standards.

Guided by the philosophy of "Innovative development, pursuit of excellence," Yuxin Medical brings together a cadre of leading domestic and international professionals and senior experts in disinfection, sterilization, and pharmaceutical equipment applications. This collective expertise positions us at the forefront of global technology trends, enabling us to deliver best-in-class solutions across medical, pharmaceutical, and laboratory cleaning, disinfection, and sterilization domains. We are dedicated to remaining a trusted partner in the pursuit of superior outcomes for our clients.

Our comprehensive product portfolio encompasses a wide range of sterilization and cleaning equipment, including but not limited to: large pulsating vacuum sterilizers, P3 biosafety sterilizers, pure steam sterilizers, ventilated sterilizers, amoule water bath leak-detection sterilizers, water bath sterilizers, jacketed quick-cooling medium sterilizers, multifunction Chinese patent medicine sterilizers, vertical and cabinet-type pressure steam sterilizers, small pressure steam sterilizers, low-temperature plasma sterilizers, low-temperature formaldehyde steam sterilizers, ethylene oxide sterilizers, washer-disinfectors, decontamination and boiling-cleaning systems for flexible endoscopes, endoscope cleaning workstations, drying cabinets, and hydrogen peroxide space sterilizers.

In addition, we offer a broad spectrum of cleaning-and-disinfection centers and laboratory systems designed to meet the stringent requirements of medical Central Sterile Supply Departments (CSSD) and pharmaceutical GMP standards. Our solutions are suitable for medical facilities, biomedical laboratories, large-animal facilities, and pharmaceutical environments, addressing the full lifecycle of cleaning, disinfection, and sterilization.

Yuxin Medical personnel rigorously adhere to international quality and environmental management frameworks, with products developed and manufactured in accordance with CE, ISO 9001, ISO 13485, ISO 14001, and ISO 45001 requirements. Our overarching mission is to provide safe, reliable, energy-efficient, and environmentally responsible products. We are committed to delivering thoughtful, premier service as an unwavering objective across all levels of the organization. Meeting and exceeding customer expectations remains our steadfast quality pledge.

We view product safety, regulatory compliance, environmental stewardship, and occupational health protection as social responsibilities. Yuxin Medical is dedicated to continuous improvement through advanced technology, scientific management, and exemplary service, ensuring enduring value for our customers and stakeholders.

"Lunan Pharmaceutical Group is a large-scale national comprehensive pharmaceutical group and a national key high-tech enterprise integrating the production, scientific research and sales of traditional Chinese medicine (TCM), Western medicine and biopharmaceuticals. Its member enterprises include eight subsidiaries such as Lunan Hope Pharmaceutical Co., Ltd., Lunan Better Pharmaceutical Co., Ltd., Shandong New Times Pharmaceutical Co., Ltd., and Lunan New Times Pharmaceutical Co., Ltd. It ranks among China's Top 500 Competitive Large Enterprise Groups and has been listed in Shandong Province's Top 100 Taxpayers for seven consecutive years.

Attaching great importance to technological innovation, Lunan Pharmaceutical Group has established a number of high-level scientific research platforms, including the National Engineering Research Center for Chiral Drugs, the National Engineering Laboratory for High-Efficiency Expression in Mammalian Cells, the State Key Laboratory of Generic Technology for Traditional Chinese Medicine Pharmaceutical, a national enterprise technology center, a postdoctoral research workstation, and ""Taishan Scholar"" positions.

While strengthening the construction of an independent innovation system, the group has maintained long-term cooperation with more than 100 renowned domestic and foreign universities and research institutions, successfully completing over 400 research projects. It has undertaken numerous national-level programs such as the National Science and Technology Support Program, the National 863 Program, the National Major New Drug Creation Special Project, the National Torch Program, and the National Key New Product Program.

More than 100 projects have won scientific and technological awards, including 6 second-class prizes of the National Science and Technology Progress Award. In recent years, the group has applied for more than 900 international and domestic invention patents, with over 500 patents granted. It has been honored with titles such as ""National Model Enterprise for Technological Innovation"" and ""National Innovative Enterprise"", and its technological innovation capability ranks among the forefront of the domestic pharmaceutical industry.

Adhering unswervingly to the business tenet of ""Benefiting Society and Creating a Better Life"", upholding the enterprise spirit of ""Facing Difficulties, Challenging Difficulties and

## EXHIBITORS' PROFILE

Overcoming Difficulties", and adhering to the guiding ideology of "Taking Reform as the Driving Force, Market as the Center, and Science and Technology as the Guide", Lunan Pharmaceutical Group has developed from a nearly bankrupt university-affiliated small factory with a net asset of 190,000 RMB and a loan of 20,000 RMB into a large-scale national comprehensive pharmaceutical group. It has been awarded honors such as the "National May 1st Labor Certificate", "National Model Home for Employees" and "National Advanced Unit for Mass Sports".

### SHANGHAI PULONG INDUSTRIAL CO LTD

NO. 189 SHENGFU ROAD, SONGJIANG DISTRICT,

SHANGHAI 200168 CHINA

E: [liu.lizhao@outlook.com](mailto:liu.lizhao@outlook.com)

W: [www.pulongflooring.com](http://www.pulongflooring.com)

"Shanghai Pulong Industrial Co., Ltd.

Formerly known as Shanghai Pulong Plastic, the company has been engaged in the full range of flooring materials including LVT rigid core vinyl flooring, PVC flooring, SPC stone plastic flooring, rubber flooring and ESD anti-static flooring, as well as the new material industry of prefabricated clean panels, VHP-resistant clean doors, windows and suspended ceilings since the early 1990s. It is a member of the China Building Decoration Association, a founding member of the China Pharmaceutical Biotechnology Association, an executive director unit of the China Resilient Flooring Association, and a vice-chairman unit of the Quick-installation Industry Branch of the China Society of Business Economics. Its legal representative Liu Yaxun also serves as the secretary-general of the branch. The company is also an ecological chain associated enterprise of Haier Group, Dajulong Group and Dianyue Group, and owns a number of domestic and international brands including PULONG, Rhinesun, Guangu, Yanyan Board, Xinyan Board, Pulong, VHP-FORTI and Royal Guard.

Pulong has successively obtained dozens of patent certificates issued by the China National Intellectual Property Administration, such as A Prefabricated Inlaid Clean Panel, Seamless Locking Stone Plastic Clean Panel, Rigid Core Vinyl Flooring, Cork Composite Flooring, Custom Pattern Composite Flooring, Locking Flooring and Mobile House, which effectively protects the company's intellectual property rights. The industry's innovative hydrogen peroxide-resistant clean panels and antibacterial PVC flooring won the High-quality Brand Recommendation Award presented by Professor Sheldon Glashow, a Nobel

Prize winner. The manufacturing process of "hydrogen peroxide-resistant clean panels" has been incorporated into the new national standard for the construction and acceptance of clean workshops in the pharmaceutical industry (GB / T51466-2025).

Pulong's products are exported to more than 20 countries and regions including Europe, America, Africa, the Middle East and Oceania, covering many overseas aid projects undertaken by China, and are also sold well across the country. The company is a strategic cooperation supplier for well-known brands such as KFC, Huawei, Roche (Switzerland), Five Guys (USA), Pfizer Pharmaceuticals, Yunnan Baiyao, Banu Hotpot, Zhou Shixiong Hotpot, JD Mall, Suning Appliance, RT-Mart, Tesco, Kungfu, Huazhu Group, Vanke Boyu, Shanghai Real Estate Chenfang, E-House China and Quanzhu Decoration Group.

At the initial stage of the COVID-19 pandemic in 2020, Pulong immediately joined hands with Dajulong Group to make a free donation of antibacterial clean panels, PVC flooring and other materials worth 6 million RMB to Huoshenshan Hospital, Leishenshan Hospital in Wuhan and some areas in Hubei Province. This charitable act was reported by mainstream media such as People's Daily, Zhejiang Daily, Dragon TV and Hubei Daily, and the company also won the honorary title of "2020 Outstanding Anti-epidemic Manufacturer" awarded by the Sign Association of China Advertising Association."

SSI Diagnostica Group is a global company with ~600 employees, specializing in infectious disease diagnostics. We focus on gastrointestinal, respiratory, and bloodborne diseases, working every day to ensure better treatment outcomes through accurate and fast patient diagnostics. SSI Diagnostica Group has scientific roots dating back to the early 1900s. We employ staff and operate offices in Denmark, the United States, and China, ensuring proximity to our customers and patients across all continents.

Each year, we deliver diagnostic solutions in more than 130 countries, helping over 60 million people receive the right diagnosis and, ultimately, the right treatment as quickly as possible. Operating as one company today, SSI Diagnostica Group is historically the result of a series of acquisitions, where five companies – SSI Diagnostica, TECHLAB, Beijing Genesee Biotech, CTK Biotech and Gulf Coast Scientific – came together to enable better treatment outcomes for patients worldwide.

Each legacy company has brought unique expertise and experience to the group, and as a combined company we offer more than 200 years of combined scientific expertise and a highly specialized product portfolio.

907, MATRIX, BEHIND DIVYA BHASKAR PRESS  
AHMEDABAD 380051 INDIA

**E:** sales.pharma@valens.co.in

**W:** www.valens.co.in

At Valens Pharmachem Pvt. Ltd., we are committed to delivering high-quality pharmaceutical raw materials and specialty excipients that empower formulation excellence across the globe. Established with a vision to serve humanity through innovation and quality, we specialize in the manufacturing and global supply of Active Pharmaceutical Ingredients (APIs), pharmaceutical polymers, ion-exchange resins, and specialty excipients.

### Who We Are

We are a research-driven pharmaceutical company headquartered in Ahmedabad, Gujarat, India. Our expertise lies in polymer-based pharmaceutical solutions designed to enhance drug delivery, improve patient compliance, and optimize formulation performance. With a strong technical foundation and industry experience, we support pharmaceutical manufacturers in developing reliable, effective, and regulatory-compliant products.

### What We Do

Our product portfolio includes:

Ion Exchange Resins for therapeutic applications and taste masking Polymer-Based APIs such as Sodium Polystyrene Sulfonate and Calcium Polystyrene Sulfonate  
Pharmaceutical Excipients & Solubilizers including Polyoxyl Hydrogenated Castor Oils (Hydrosol series) Methacrylic Acid Copolymers for enteric and sustained-release formulations  
Customized Granules, Pellets, and Directly Compressible Blends

We continuously innovate to meet evolving formulation requirements in tablets, capsules, syrups, suspensions, emulsions, sachets, and controlled-release dosage forms.

### Our Commitment to Quality

Quality is the foundation of everything we do. Our manufacturing operations follow stringent cGMP guidelines, supported by advanced quality control systems and in-house testing facilities. We maintain comprehensive documentation practices and regulatory support systems to meet global compliance standards.

### Research & Innovation

Our in-house R&D and application laboratory focus on:

Polymer development and modification  
Customized particle size optimization  
Formulation troubleshooting and technical support  
Regulatory documentation assistance

We collaborate closely with our customers to deliver tailored solutions that align with their product development goals.

Global Reach

We proudly serve pharmaceutical companies across multiple international markets, delivering consistent quality, competitive pricing, and dependable supply chains.

Water Technology BD Limited (WTBL) is one of the leading water and wastewater engineering companies in Bangladesh, dedicated to delivering sustainable, innovative, and cost-effective environmental solutions. Since its inception, WTBL has been providing complete design-build-operate services for Effluent Treatment Plants (ETP), Sewage Treatment Plants (STP), Water Treatment Plants (WTP), Reverse Osmosis (RO), Demineralization (DM), and Zero Liquid Discharge (ZLD) systems across industrial and commercial sectors.

With a proven track record of over 600+ successful installations nationwide, WTBL has become a trusted partner to major industries, including textile, pharmaceuticals, pulp and paper, food & beverage, cement, and economic zones. Our expert engineers and environmental consultants ensure every project meets Department of Environment (DoE) and BEZA regulatory standards while optimizing performance, cost, and sustainability.

As a Bangladeshi environmental engineering firm, WTBL takes pride in manufacturing high-quality treatment units such as DAF systems, clarifiers, screeners, sand filters, and RO skids in-house—reducing import dependency and promoting local innovation. We also collaborate with leading global brands like DuPont, Mutag, and Inge to integrate world-class technologies into every project.

At WTBL, we believe that clean water is the foundation of sustainable industry. Our mission is to drive industrial growth through eco-friendly water solutions, resource recovery, and circular economy principles—making us a pioneer in industrial wastewater management in Bangladesh.

WTBL – Your trusted partner for water, wastewater, and environmental solutions in Bangladesh.

"Zhejiang Chemsyn Pharm Co., Ltd. was founded in October 2007, located in Quzhou City, Zhejiang Province, beautiful garden city on the border of Zhejiang, Fujian, Jiangxi and Anhui Provinces. Covering an area of about 78,000m<sup>2</sup>, the company is a national high-tech enterprise integrating the R&D, production and sales of veterinary APIs, pharmaceutical APIs and intermediates.

Since its establishment, the company has gradually grown into a manufacturer of veterinary APIs with anti-microbial and anti-parasite as the core, and pharmaceutical APIs with antipyretic-analgesic and antibacterial as the core,

forming the advantage of simultaneous development of veterinary APIs and pharmaceutical APIs.

The company has independently mastered the synthesis technology to make the main products of sulfa-APIs and intermediates industry chain through basic chemical raw materials, it is one of the enterprises with the longest industry chain of sulfa-APIs and intermediates, the most complete varieties and the most competitive in the industry."

Zhejiang Dongou Filter Manufacturing Co., Ltd., established in 1986, is a technology leader in the field of polymer precision microporous filtration in China.

The company specializes in the R&D and manufacturing of various precision filtration systems and equipment, holding multiple national patents and international certifications. Its products are widely used in new energy, chemical, environmental protection, pharmaceutical, and other industries, striving to provide globally leading filtration solutions. Dongou provides custom-engineered microporous precision filtration solutions.

Our core products include flexibly configured filtration systems and UHMWPE sintered filter elements, featuring high-temperature resistance, chemical-proof durability, and multi-cycle regeneration for efficient solid-liquid separation. With automated PLC controls and skid-mounted delivery, we serve industries like new energy, chemicals, and environmental protection with reliable, turnkey filtration systems.

Accelerating Pharma Research  
& Bringing Medical Science to Life

### Primary Care

State of the art Oral, Solid, Semi Solid and Sterile facility.  
OSD facility accredited by TGA, Australia and NPRA, Malaysia.

### Cephalosporin

Dedicated facility for Cephalosporin.  
Conforming CGMP guidelines of WHO/EU/PICS/ICH.

### Metered Dose Inhaler & Dry Powder Inhaler

State of the art Manufacturing Facilities  
1<sup>st</sup> Alcohol Free Inhaler in Bangladesh

### Oncology

First USFDA guided Oncology Plant in Bangladesh.  
State of the art OEB-5 compliant containment facility.

### Biotech

Most advanced RABS & BSL2 safety cabinet system.  
Automatic VHP decontamination system.

### Hormone

21CFR Part II compliant facility.  
Fully automated CIP & SIP system.

### Vaccine

Latest technology, fully automated vaccine plant.  
Future of medical science.

Healthcare

Accredited by:

Australian Government  
Department of Health and Ageing  
Therapeutic Goods Administration

NPRA  
MALAYSIA
